REQUEST YOUR ASSISTANCE

OUR NEEDS:

Starting from this spring, we will be conducting a study on agricultural pesticide workers' coveralls. We wish to analyze the effect of routine wear on the durability and protective characteristics of the coveralls for three different coverall models. We are in need of agricultural pesticide workers' information firsthand.

WHO CAN HELP:

Agricultural pesticide workers and their employers who, as part of your daily routine, come in contact with farm pesticides.

HOW YOU CAN HELP:

If you agree to be in this study, you will be provided with 3 sets of coveralls. We ask that you wear the each coveralls for 2 to 4 hours over a 2 week period. The study participants will be asked:

- To keep a log (provided) of the times you wear the coveralls.
- After the 2 week period, the coveralls and logs will be collected and a questionnaire will be given
- Participate in a focus group meeting to discuss the coveralls, along with other participants in this study.

COMPENSATION:

Each participant will be given \$20.00 for their participation in this research study, and free lunch at the focus group.
